

# PRAGUE REGION

## ABOUT REGION

The capital of Czech Republic is situated in the middle of Středočeský kraj (Central Bohemia Region) which surrounds it completely. On January 1, 2009 the area of Prague amounted to 496 km<sup>2</sup> (0.6 % of Czech Republic territory).

Its population was decreasing in the last 15 years but now it is growing again with more people moving to the capital. Population of the metropolitan region on June 30, 2009 reached 1,231,820 inhabitants in H1 2009, about 12 % of the population of the Czech Republic. As number of inhabitants is concerned, Prague is number two among regions, second only to Moravskoslezský kraj (Moravia-Silesia).

The Historic Centre of Prague was put on the UNESCO World Heritage List in 1992 as one of the largest urban sanctuaries in the world. There are more than 1,300 historic buildings protected by law as national monuments. The capital's economy is being strongly supported by the mass development of tourism. Prague accommodation services account for half of nights spent by foreign tourists in Czech Republic. The capital is also number one among destinations for all foreign tourists visiting the country. However, some indexes put Prague in an inferior position, e.g. average number of nights spent (by foreign tourists) per capita – in this respect Prague is second to the region Karlovy Vary.

Prague is also the seat of several universities. Univerzita Karlova (Universitas Carolina - Charles University) was founded in 1348. Virtually all non-technical fields of studies are being taught at its 17 colleges, 14 of which are located in Prague. Other examples of Prague's universities are: České vysoké učení technické (ČVUT - Czech Technical University), Vysoká škola ekonomická (VŠE - University of economics) Česká zemědělská univerzita (ČZU - Czech University of Life Sciences) and Vysoká škola chemicko-technologická (VŠCHT - Institute of Chemical Technology). Study of the arts is available at Akademie múzických umění (AMU - Academy of Perform-

ing Arts), Akademie výtvarných umění (AVU - Academy of Fine Arts) and Vysoká škola umělecko průmyslová (VŠUP - Academy of Arts Architecture and Design). The Police Academy of the Czech Republic is also located in the capital. More than 20 private universities have been founded in Prague since 1997.

In the area of research and development of new technologies, Prague is the undisputed leader in the country. Nearly all of the institutes of the Academy of Sciences of Czech Republic are seated in Prague. Expenditure on science and research in 2004 per capita in the Prague Region amounted to Kč 11,362 with 2.06 % of employees from the capital working in this field. For several years now, Prague has seen development in the line of retailing, transport and tourism. In the manufacturing industry, production of business machines and computers is in good shape.

Prague, as a seat for business, has its advantageous points: there is a qualified workforce and supplying firms within easy reach. Furthermore, universities and other schooling institutions, as well as development centers, are at hand to provide education for prospective employees. Traditional domains that are well developed in Prague and its vicinity are car manufacturing, pharmaceutical and brewing industries. The strong potential of this region is re-enforced by its well developed structure of roads and railways connected to the European transportation network, well established municipal transport – although the road orbital has not been yet completed, and the newly refurbished airport with tens of regular flight connections.

There is good accommodation capacity in the capital, many historic buildings and monuments, more than average density of the telephone system network, a population with a high proportion of people in productive age, highly qualified workforce and a high proportion of foreign investments flowing to the city. Suppliers are never far away. Sciences, education, health care and culture in the region are of a very top quality.

RENTS IN INDUSTRIAL PREMISES IN CR REGIONS (EUR/sqm/month)

Prague Region	3,50-4,25
Note 1: Net effective rents for units ca 4,000 sq m which is average deal size in the market	
Note 2: Premises are immediately available only some regions.	

Source: CB Richard Ellis

PRIME RENTS IN SHOPPING CENTRES (EUR/sqm/month)

Prague Region	30-110
Note: for units ca 100 sqm.	

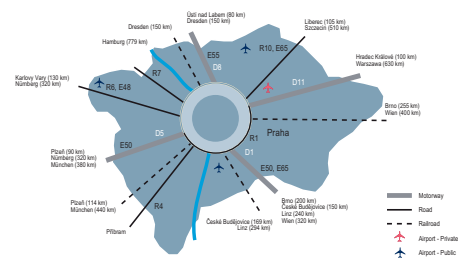

Source: CB Richard Ellis

PRIME RENTS IN OFFICE PREMISES IN PRAGUE (EUR/sqm/month)

Prague	City Centre: 21-22
	Inner City: 15-17.50
	Outer City: 12-14

„Prime rent definition: Prime Rent – typical ‘achievable’ open market headline rent (can be hypothetical) for a unit of standard size commensurate with demand in each location, of highest quality and specification and in the best location in a market at the survey date. It does not need to be identical to any of the transactions, particularly if the deal flow is very limited or made up of unusual one-off deals.
