

# MORAVIA-SILESIA REGION

## BASIC DATA

The Moravia-Silesia Region lies in northern Moravia along the Polish and Slovak borders. Its other neighbors are the regions of Olomouc and Zlín. Moravia-Silesia is divided among six districts: Bruntál, Frýdek-Místek, Karviná, Nový Jičín, Opava and Ostrava. Its area is 5,427 km<sup>2</sup> (January 1, 2006), 6.9 % of the national territory, making it the 6th largest region in the country. Moravia-Silesia is the most populated region in Czech Republic. On December 31, 2006 there were 1,249,290 inhabitants (12.1 % of the population of the Czech Republic). Inhabitants are concentrated in rather large towns and cities; therefore the region is highly urbanized. Ostrava, the regional capital with a population of 3,096,098 is the third largest city in the Czech Republic. There are 31 towns and cities with populations exceeding 5,000 in the region.

There are three protected landscape areas in the region, Jeseníky, Poodří and Beskydy (the largest protected landscape area in the Czech Republic). There are downhill pistes, cross country skiing tracks and hiking tracks in sufficient quantity in the Jeseníky and the Beskydy mountains; tourists are going there in all seasons. There are three urban sanctuaries in Moravia-Silesia: Nový Jičín, Příbor and Štramberk. The most visited castles are Hradec nad Moravicí, Kravaře, Sovinec and Hukvaldy. None of the region's landmarks are registered on the UNESCO list of world heritage but the complex of former mines in Ostrava is on a list of candidates.

There are three universities in Moravia-Silesia. Vysoká škola báňská-Technická univerzita Ostrava (a mining university, VŠB-Technical university of Ostrava) with seven colleges. New specializations are being added to traditional studies of this region (mining, geology, metallurgy), including nanotechnologies and mechatronics.

Ostravská univerzita (OU) offers studies in both natural sciences and humanities; also pedagogy and art. Slezská univerzita (Silesian University - SU) is divided between Opava and Karviná. Philosophy and natural science is studied in Opava, the business and commerce college is seated in Karviná. There is a similarly oriented Vysoká škola podnikání (Business University) in Ostrava.

In 2004 expenses on research and development in Moravia-Silesia reached Kč 1,759 per capita (8th place in the Czech Republic) and 0.30 % of all employees worked in research and development (11th place in the Czech Republic).

Moravia-Silesia Region is an area with a long industrial tradition, but nowadays it is in profound decline. The basic sector of activities here consists of metallurgy, mining, energy and heavy industry. Chemistry and electronics industries are other important fields of business. A high number of cluster initiatives are a phenomenon typical for Moravia-Silesia. The most developed clusters are in the fields of renewable sources of energy, machinery, car making and wood working. New technological clusters were founded in the construction industry, ICT and selected specializations of the chemical industry.

The region's potential is in the rich supplies of quality raw materials for the energy and the construction industry as well as a plentitude of qualified workers for selected industries. There is the second largest national airport in the region and two modern railway corridors. Local life environment has been improving substantially, and mountain areas are suitable for further development of tourism in all seasons and cycling.
