

OLOMOUC REGION

ABOUT REGION

The Olomouc Region stretches from central Moravia across the Jeseníky mountains north up to the frontier of Poland. On other sides it borders regions Moravia-Silesia, Zlín, South Moravia and Pardubice. The region is divided among five districts: Jeseník, Olomouc, Prostějov, Přerov and Šumperk. Its area is 5,267 km² (January 1, 2006), 6.7 % of the national territory, making it the 8th largest region in the country. On December 31, 2006 there were 639,894 inhabitants (6.2 % of the population of the Czech Republic, the 6th most populated region in the country). Its 397 communities make up for 6.4 % of all communities in the country. Olomouc, the regional capital with a population of 100,168 is the 5th largest city in the Czech Republic. There are 13 towns and cities with populations exceeding 5,000 in the region.

Protected landscape areas include the Jeseníky Mountains, Litovelské Pomoraví and Hranická propast and they belong to the most valuable natural monuments. The most visited castles are Bouzov, Helfštýn, Šternberk, Náměšť na Hané or Velké Losiny. A number of folklore organizations take care of preserving the local tradition in the Haná region, taking part in various festivals. Svatý Kopeček at Olomouc is an important pilgrimage venue. The Jeseníky Mountains form about a third of the region's territory in its northern part. There are good conditions for skiing, cross country and alpine, as well as for summer outdoor activities. There are over 70 biking paths in the region. The urban sanctuaries in the region are at Olomouc and Lipník nad Bečvou. A 35 meter high pillar of Saint Trinity in Olomouc City is the only regional landmark registered on the UNESCO list of the world heritage but the historic paper mill in Velké Losiny is also trying to obtain the registration. Local spas are also of great importance for tourism. Jeseník was among the first of several places in the

world applying hydrotherapy. Other spas in the region are Lipová lázně, Teplice nad Bečvou, Velké Losiny and Bludov.

The second oldest university in the Czech Republic, Univerzita Palackého (UP) in Olomouc, with its seven colleges, is the largest university in the region. Studies available there include medicine, theology, philosophy, law, pedagogy and sports. Possibilities to study information and some of the natural sciences make up somewhat for the deficiency of technical studies. A branch of Vysoká škola báňská (Mining University) in Šumperk is oriented mostly on studies in the line of machinery. As for private universities there is Vysoká škola logistiky (Logistics University) in Přerov and Moravská vysoká škola (Moravian University) oriented mainly on informatics and management.

In 2004 expenses on research and development in the Region Olomouc reached Kč 1,660 per capita (9th place in the Czech Republic) and 0.39 % of all employees worked in research and development (5th place in the Czech Republic).

Farming provides for more than the average share of the regional GDP (mainly sugar beet and hops), as well as the processing industry. Garment, machinery and electronics industries are of the utmost importance. There are clusters in the car making and garment industries, as well as nanotechnologies and information technologies in the Olomouc Region.

As further development potential is concerned, there is fertile soil in the Olomouc Region, good railway connections (corridors I. and III.), the second oldest university in the country, clean air, a large number of historic landmarks, many folklore festivals, mountain areas usable for tourism throughout the year, and a large network of biking trails.
