

# PRAGUE

## ABOUT REGION

The capital of Czech Republic is situated in the middle of Středočeský kraj ( Central Bohemia Region) which surrounds it completely. On January 1, 2006 the area of Prague amounted to 496 km<sup>2</sup> (0.6 % of Czech Republic territory). The region (kraj) of Prague is smaller than all other Czech regions. Its population was decreasing in the last 15 years but now it is growing again with more people moving to the capital. Population of the metropolitan region on December 31, 2006 reached 1,188,126 inhabitants, i.e. 11.6 % of the population of the Czech Republic. As number of inhabitants is concerned, Prague is number two among regions, second only to Moravskoslezský kraj (Moravia-Silesia).

The Historic Centre of Prague was put on the UNESCO World Heritage List in 1992 as one of the largest urban sanctuaries in the world. There are more than 1,300 historic buildings protected by law as national monuments. The capital's economy is being strongly supported by the mass development of tourism. Prague accommodation services account for half of nights spent by foreign tourists in Czech Republic. The capital is also number one among destinations for all foreign tourists visiting the country (89.8 %). However, some indexes put Prague in an inferior position, e.g. average number of nights spent (by foreign tourists) per capita – in this respect Prague is second to the region Karlovy Vary. The Czech capital is still lacking accommodation capacity in the category of five star hotels.

Prague is also the seat of several universities. Univerzita Karlova (Universitas Carolina - Charles University) was founded in 1348. Virtually all non-technical fields of studies are being taught at its 17 colleges, 14 of which are located in Prague. Other examples of Prague's universities are: České vysoké učení technické (ČVUT - Czech Technical University), Vysoká škola ekonomická (VŠE - University of economics) Česká zemědělská univerzita (ČZU - Czech University of Life Sciences) and Vysoká škola chemicko-technologická (VŠCHT - Institute of Chemical Technology). Study of the arts is available at Akademie múzických umění (AMU - Academy of Performing

Arts), Akademie výtvarných umění (AVU - Academy of Fine Arts) and Vysoká škola umělecko průmyslová (VŠUP - Academy of Arts Architecture and Design). The Police Academy of the Czech Republic is also located in the capital. More than 20 private universities have been founded in Prague since 1997.

In the area of research and development of new technologies, Prague is the undisputed leader in the country. Nearly all of the institutes of the Academy of Sciences of Czech Republic are seated in Prague. Expenditure on science and research in 2004 per capita in the Prague Region amounted to Kč 11,362 with 2.06 % of employees from the capital working in this field.

For several years now, Prague has seen development in the line of retailing, transport and tourism. In the manufacturing industry, production of business machines and computers is in good shape and there is there is starting to be growth in the construction business. Prague, as a seat for business, has its advantageous points: there is a qualified workforce and supplying firms within easy reach. Furthermore, universities and other schooling institutions, as well as development centers, are at hand to provide education for prospective employees. Traditional domains that are well developed in Prague and its vicinity are car manufacturing, pharmaceutical and brewing industries.

The strong potential of this region is re-enforced by its well developed structure of roads and railways connected to the European transportation network, well established municipal transport – although the road orbital has not been yet completed, and the newly refurbished airport with 50 regular flight connections. There is good accommodation capacity in the capital, many historic buildings and monuments, more than average density of the telephone system network, a population with a high proportion of people in productive age, highly qualified workforce and a high proportion of foreign investments flowing to the city. Suppliers are never far away. Sciences, education, health care and culture in the region are of a very top quality.

## BASIC DATA

Land Area.....496 km<sup>2</sup>

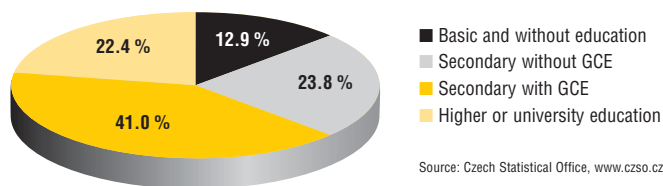

## POPULATION

**Total** ..... **1,188,126**  
 Percentage in the total population of Czech Republic (%) ..... 11.6

## Take the lead. Know your risk.

*Every decision you make can affect your probability. And as you'll know, making the best strategic decisions is impossible unless you can see all the potential risk. D&B can help you with these decisions in the areas of:*

### RISK MANAGEMENT

- Understand and manage risks that your company is exposed to during business co-operation with your suppliers
- Identify customers where debt recovery implementation is needed
- Bring in savings by implementation of zero credit risk policy
- Benefit from advanced linkage intelligence which seeks out hidden corporate relationships and hidden risks

### SALES & MARKETING

- Determine your customers and their importance in company portfolio
- Discover still unrevealed potential in your current customer base
- Acquire new profitable customers corresponding to your current customer base
- Monitor competition following real data

### SUPPLY MANAGEMENT

- Analyze and set the standards in your supply base
- Understand where and what you are purchasing and from whom
- Identify risks and dependencies of your suppliers to help you evaluate the risks
- Reveal corporate structure of your suppliers

### E-BUSINESS

- Accelerate your decision making by means of integration of clients' data with exceptional D&B data
- Set your decision-making strategies
- Bring consistency to your decision making process across your organization
- Sophistically manage portfolio of your customers and suppliers

Decide with Confidence

Use the strength of D&B global database  
of more than 120 million companies.

Don't Just Be Sure. Be D&B Sure!™
