

ÚSTÍ REGION

ABOUT REGION

The Ústí Region in North Bohemia stretches along the border with Saxony. Its neighbors within limits of the Czech Republic are the regions of Karlovy Vary, Liberec, Central Bohemia and Plzeň. The region is divided in seven districts: Děčín, Chomutov, Litoměřice, Louny, Most, Teplice and Ústí nad Labem. The region's area on January 1, 2006 was 5,335 km² (6.8 % of Czech Republic territory), the seventh largest in the country. Population on December 31, 2006 amounted to 823,265 inhabitants (8.0 % of the country's population, number five among all regions). There are 354 communities in Ústecký kraj (5.7 % of all communities in Czech Republic). The regional capital Ústí nad Labem has 94,565 inhabitants. There are 26 towns with a population over 5,000 in the Ústí Region.

The Ústí Region is full of historical landmarks, none of which have been put on the UNESCO list of World Heritage. The site with the most potential for getting on the list is Terezín, once a fortress and later a Jewish ghetto. Urban sanctuaries are found in Kadaň, Litoměřice, Ústětk and Žatec. The rotunda of St. George on top of Říp Mountain belongs to the symbols of the region. Other valuable monuments include castles (Duchcov, Ploskovice) and monasteries (Doksany, Osek). National park České Švýcarsko (Czech Switzerland) abounds with natural monuments. There are also protected landscape areas Labské pískovce (Labe Sandstones), České středohoří (mountains) and Lužické hory (mountains). There are many bicycle paths passing through the region, and a long cross country skiing track "Krušnohorská ski-highway" is running along the Krušné hory range. In mining town Most there is quite an uncommon building to be seen – a Gothic church that had to be pushed away by half a mile in 1975

to clear the way for bucket excavators. Most also offers a large range of sporting facilities that include a car race circuit, a horse racing track and an aqua park.

The most important university in the Ústí Region is Jan Evangelista Purkyně in Ústí nad Labem (UJEP) with five colleges focused mainly on pedagogy, humanities and partially also on artistic studies. For private universities there is an affiliate of The Institute of Finance and Administration in Most. In 2004, research and development regional expenses per capita amounted to Kč 621 (13th place, second to last in the country). Only 0.13 % of employees took part in development and research (also 13th place for the region).

The Ústí Region, with all the area below the Krušné hory mountain range, is an industrial site of international importance. There is a great tradition in construction, mining, power engineering, glass blowing and chemical industries. Agriculture also has its importance in the region—mainly hop farming, fruit production and viticulture. There is no important industrial clusters working in the area. CzechInvest agency's surveys are focused on possibilities in line of compostable plastics.

The potential of the Ústí Region is based, among other things, on raw materials in abundance for supplying local sectors of power engineering and construction. Thanks to its position, the region is well connected to main transportation arteries both at home and abroad. The railway corridor there is finished and serving, the highway D8 copying the road E5 is under construction. The chemistry industry is traditionally strong, the fertile soil is promising (and giving) prosperity to local viticulture, and there is much potential in skiing, mountain trekking and tourism bound to local historic landmarks.
