

VYSOČINA REGION

ABOUT REGION

The Vysočina Region is situated in the southern half of the country, astride over the boundary between both the historic countries of the Czech crown. It borders with regions Central Bohemia, Pardubice, South Moravia and South Bohemia. The region is divided among five districts: Havlíčkův Brod, Jihlava, Pelhřimov, Třebíč and Žďár nad Sázavou. Its area is 6,796 km² (January 1, 2006), 8.6 % of the national territory, making it the 5th largest region in the country. On December 31, 2006 there were 511,645 inhabitants (5 % of the population of the Czech Republic, 11th most populated region in the country). There are 704 communities in the Vysočina Region, 11.3 % of all communities in the Czech Republic. In this respect the region of the Vysočina Region assumes 2nd place in the country but its communities are mostly very small. Jihlava, with population of 50,916, is the regional capital. There are 18 towns with populations exceeding 5,000 in the Vysočina Region.

There are two protected landscape areas – Žďárské vrchy and Železné hory in the Vysočina Region. The region is well suited for tourism throughout the year. The best conditions for skiing can be found around Nové Město na Moravě, the venue of a regular World Cup cross-country ski race Zlatá lyže Vysočiny (Golden ski of the Highlands). Thanks to its well preserved nature, the region is a coveted area of agro- and eco-tourism. There are three UNESCO registered landmarks. The oldest registration is that of the historic center of the town of Telč, and then there is a traditional pilgrimage venue in the church of St. Jan Nepomucký in Zelená hora. The third item in the region was put on the UNESCO list only in 2003: Jewish Town and basilica of St. Prokop in Třebíč. In Jihlava, Třebíč and Telč, there are also urban sanctuaries.

Public universities were lacking for a long time in the Vysočina Region. A remedy for this deficiency was found in 2004 when the College of Polytechnics in Jihlava was made available for the public. The offer of studies, at first rather poor (finances and tourism only) was enlarged in 2006-2007 with information and machinery, which are key lines of business in the Jihlava region. For private universities there is Západomoravská vysoká škola (West Moravia University) in Třebíč, focused exclusively on IT disciplines at present. Many businesses in the region are contributing to scholarships for students in order to keep an educated workforce within the region. In 2004 expenses on research and development in the Vysočina Region reached Kč 1,023 per capita and 0.15 % of all employees worked in research and development. Both these parameters put the Vysočina Region to 12th place among the regions of the Czech Republic.

Although the Vysočina Region were focused mostly on farming and forestry for a long time, there are industries developing there. Among the most important industries are machinery, energy, production of parts for car making factories and partially also the food industry and glassmaking. Cluster development conditions are more difficult then elsewhere in a way. CzechInvest agency is surveying possibilities to build up a wood-working cluster. Possibilities for new clusters in the machinery field are to be studied soon.

Potential of the region: traditional farming production, optimal conditions for production of selected crops, transportation lines of European importance, placement of new machinery businesses, gradual development of universities, UNESCO World heritage landmarks, developing eco-tourism.

BASIC DATA

Land Area.....6,796 km²

POPULATION

Total **511,645**
 Percentage in the total population of Czech Republic (%) 5.0
