

CZECHINVEST
Investment and Business Development Agency

Business Real Estate Section

Connecting investors with the appropriate location

The business and investment development agency CzechInvest administers a database of business properties that is one of the most extensive of its kind in the Czech Republic. The data is not public and primarily serves the purposes of companies in the areas of manufacturing, business support services and technology centers that are seeking suitable properties for their business operations.

Our Services

- + obtaining relevant information about the real estate market and providing consultations
- + identifying suitable locations based on project parameters
- + use of our expansive database of industrial zones and other real estate for industry and business
- + mediation of contact with property owners, state administration and local government
- + organization of visits and tours of individual locations
- + offering brownfields as investment opportunities
- + providing advice on gaining financial resources from public budgets
- + consultancy in the preparation and financing of projects, preparation of industrial zones and regeneration of brownfields
- + support and promotion of business real estate and brownfields
- + free registration of new properties in the database
